新灵犀科技 · 公司与产品事实表

中英双语 / Chinese and English · 2026-11-01

中文 · 公司与两条产品路径

北京新灵犀科技有限公司（LingxiNova / 新灵犀科技 / 灵犀新星）。品牌口号：探索 AGI 的无限可能。使命：让 AI 给公司赋能。

LXRouter 管智能的供给，BXAGI 管智能的组织。两条产品路径各自成立、相互支撑；NovaStation 灵犀工作站是本地部署与硬件交付形态。

中文 · BXAGI

BXAGI 是企业级 AGI 智能体操作系统，把 AI 带入岗位、组织与业务流程。当前公开模板目录为 516 个预置岗位模板，覆盖销售、法务、财务、客服、研发、市场、人力、运营等职能；具体可用模板以当前目录为准。

核心能力包括岗位与团队配置、三层记忆（对话、工作、组织知识图谱）、工具与工作空间、任务 DAG 协作、使命契约、验证门与产物引用、审批与审计，以及员工运营。智能体协同已实现；智能涌现是长期方向，不代表已实现通用人工智能。

支持 SaaS、企业私有化部署及 NovaStation 本地交付。私有化不自动等于数据永不出域：模型调用、工具权限与网络出口决定数据边界。本地模型配合受限工具及网络，可按交付方案配置离线运行；外部模型和工具需逐项评估数据流。价格、上线周期与适配清单按当前平台及合同约定。

中文 · LXRouter

LXRouter 是托管式 Token 供应链与 AI 智能电网，提供模型接入、供给路由、冗余与故障切换、用量计量及成本管理。路由级、模型级与任务级管理已进入行业应用。

支持文本与推理、图像生成与编辑、语音识别与合成、视频生成与素材管理；模型可用性、协议与参数以平台文档和模型列表为准，不承诺所有模型支持所有能力。

文本模型按 Token 用量计费；图像、语音和视频按各模型公布的 Token、张数、时长等单位计费。Auto 任务级调度、视频生成任务均不等于按业务任务验收结算。按验收通过业务任务付费仍处于研发与商业验证阶段。

供给价格约为对标价的 35%–95%（3.5–9.5 折），依模型、供给与合同而定，不是固定优惠或节省比例保证。白皮书中 2026 年 9 月的反馈、路由准确度与成本实验仅适用于其样本和配置，不应当作当前全平台效果或客户收益承诺。

中文 · 案例与资质

服装行业案例使用 14 名 AI 员工执行七步海外业务流程，支持 24 小时运行，已有付费及续费；医院案例为分阶段建设；工业案例包括中电科 41 所已交付项目。案例是特定项目的经历，不能直接外推为其他客户的收益。公司参与 NVIDIA Inception 计划，不等于 NVIDIA 对产品效果的背书。

English · Company and product paths

Beijing Xinlingxi Technology Co., Ltd. trades as LingxiNova, 新灵犀科技 and 灵犀新星. Its brand slogan is “Exploring the possibilities of AGI”; its mission is to make AI empower companies.

LXRouter supplies intelligence; BXAGI organizes intelligence into enterprise work. The two product paths stand independently and reinforce each other. NovaStation is an on-premises appliance and delivery option.

English · BXAGI

BXAGI is an enterprise AGI agent operating system that brings AI into roles, organizations and business workflows. Its current published catalog contains 516 prebuilt role templates, spanning functions such as sales, legal, finance, service, engineering, marketing, HR and operations. Available roles follow the current catalog.

Capabilities include role and team configuration; conversational, working and organizational graph memory; tools and workspaces; task DAG collaboration; mission contracts; verification gates and artifact references; approvals, audit and employee operations. Agent collaboration is implemented; emergent intelligence remains a long-term direction. The product name is not a claim that general artificial intelligence has been achieved.

Delivery options include SaaS, enterprise private deployment and NovaStation. Private deployment alone does not guarantee zero data egress. Model calls, tool permissions and network egress determine the data boundary. Local models with restricted tools and networking can support a specified offline configuration; external services require a data-flow assessment. Pricing, deployment timelines and compatibility depend on the current offering and contract.

English · LXRouter

LXRouter is a managed Token supply chain and AI smart grid providing model access, supply routing, redundancy and failover, usage metering and cost management. Route-, model- and task-level management are used in industry applications.

It supports text and reasoning, image generation and editing, speech recognition and synthesis, and video generation and asset management. Availability, interfaces and parameters depend on the published model catalog and documentation. Not every model supports every capability.

Text model usage is billed in Tokens. Image, audio and video services follow model-specific units such as Tokens, images or duration. Auto task scheduling and video generation jobs are not accepted-business-task billing. Billing by accepted business task remains an R&D and commercial validation objective.

Supply pricing is approximately 35%–95% of the comparison price, depending on model, supply and contract. This is not a fixed discount or savings guarantee. September 2026 feedback, routing accuracy and cost experiments in the whitepaper are limited to their original samples and configurations; they are not current platform-wide performance promises.

English · Cases and credentials

An apparel case uses 14 AI employees in a seven-step overseas workflow, supports round-the-clock operation, and has paid adoption and renewal. Hospital delivery proceeds in phases. An industrial delivery includes CETC Institute 41. Individual cases do not guarantee outcomes for other customers. NVIDIA Inception participation is not a product-performance endorsement.
